1.WHO DOES THE PROBLEM AFFECT?

During Fire Detection , Peoples & Animals Get Affected Due to Inhaling of Harmful Flammable Fire & It Can Be Stopped By The Fire Department By Using This Forest Fire Detection System.

2.WHAT IS THE ISSUE?

Fire can make major hazards in this hectic world. Forests are one of the main factors in balancing the ecology. It is very harmful when a fire occurs in a forest & it is highly important to introduce a system to detect the fire early as possible.

3.WHAT IS THE IMPACT OF THE ISSUE?

Most of the time , the detection of forest fire happens when it spread over a wide region . Sometimes, it could not be possible to stop the fire. As a result , the damage of the environment is higher than predictable .

4.WHAT WOULD HAPPEN IF WE DIDN'T SOLVE THE PROBLEM?

The Forest Fire causes an explosion of fire if the vapours comes to the contact with trees and leaves. Then further expanding the fire leads to deforestation.

5.WHAT WOULD HAPPEN WHEN IT IS FIXED?

This Application and Software makes the job much more easier. This solution helps to prevent high risk of forest fire evaluations and explosions and affecting any casualities within & outside the premises.

6.WHY IT IS IMPORTANT THAT WE FIX THE PROBLEM?

It is important to fix the problem because it leads to deforestation and thus it might cause leading to non-living of animals in the forest areas and they'll become extinct.
